FINANCE AND TRADE.

THE MONEY POSITION shows no change, although we are passing out of the winter into spring; in the cotton | holders withdrew from the market. regions, the manufacturing regions and the grain regions the state of things remains the same-more money at the banks than there are borrowers for, and general quietude in business. The St. Louis Globe reports that, although there is rather more life in the money market it is not equal to really strong and active times, and rates rule easy at 8@10 per cent, generally at 8. The Cincinnati Gazette reports only a moderate demand for money with ample supplies of loanable funds; the customary rate is 8 per cent., but first class paper is done at less; lenders were seeking borrowers. The Chicago Tribune reports an increase of country buyers, bank deposits increasing and the demands for loans diminishing; bank notes 8@10 per cent. The New York Times reports a better feeling in financial circles. Increase in the oullion held in the Bank of England and the bank of France obliterates the influence of the recent London failures. The Times adds: "Merchants just arrived in town from Chicago and St. Louis bring the cheering intelligence of improving business and a general improvement in trade at those points, growing out of the advanc-ing tendency of the wheat mar-ket. The reduced rates of freight between these cities and the east are stimulating a revival of trade " Referring to the gold clique the Times continues: "Great efforts will be made toget the reserve of the banks below the legal limit by keeping about ten million do'lars gold off the market. The present tactics of the gold clique, if continued much longer, will result in increasing largely the supply of gold at this point. Already gold is pouring in from California, six hundred and fifty thousand dollars gold coin having arrived from San Francisco yesterday consigned to the leading bankers, and more is on the Gold is also coming from Canada and Europe. It is estimated that twelve million dollars gold coin has arrived here from San Francisco since January st. The tressury has large interest obligations to pay May 1st, and it is inti-mated that these gold disbursements will be anticipated early in April as soon as the registered books, which close March 21st, can be made up. From all these sources the banks are likely to gain gold in the future, and the gold clique may learn to their sorrow that time for a gold famine in this country is not near at hand." At our banks exchange was in better offering than on Tuesday, at i discount on New York, with | premium for the counter rate. Gold was down in New York in the morning to 115g and 115g;

active yesterday; there was no change in telegrams, but the demand for superior cottons at the present rates was light, while the lower grades that are wanted were in small supply. The offerings were not large, and buyers were of opinion that prices, considering the decline in gold, were too high. New York quoted 16%c, New Orleans 15½c, Liverpool 7 15 164 Sayangah 15½c Mo. NEW YORK, March 24.-Money easy be had at \$2.50 by the round lot; peachplows are becoming scarce, and are
very firm. Processions were firm throughout. The St. Louis Globe, of Monday,
says buoyancy in the market there
mounted to fever heat, prices were unmounted to fever heat, prices were unsettled and holders' ideas elevated; the Globe adds: "It would seem that these periods of excilement warm the blood of speculators, too, and bring their of speculators, too, and bring their courage to the sticking point, for there has been a fairly active movement \$70,000. Clearings, \$50,000,000. Governthere has been a fairly active movement in options during the week, especially in pork. To those short and settling, or with unexpired contracts on which additional margins have been exacted, the rapid advance in this latter article has been like a rough saddle on a sore back. The representatives of the order trade shook their heads, from day to day, as much as to say, 'we would like to know what this thing is coming to;' but they had no recourse, and sailed in, fearful of had no recourse, and sailed in, fearful of what another diurnal turn of the wheel might bring forth." Coffee, says the New York Grocer, is increasing in stock at Kie with lower raises and a saveral stock market has been regular and moderately active during the day. Stocks which had been going up so steadily for the past week fell off, evidently on the realization of sales, while at Rio, with lower prices and a weak several stocks which have been very market; the market here is depressed.
"To this must be added the effect of the high premium on gold, which materialhigh premium on gold, which materially affects the currency prices. Neither has the jobbing trade with the interior been satisfactory this week; not that it shows any material falling off, but that it has not increased, and also what has it has not increased, and also what has freight from and to New York. MARINE CHRONICLE.

Meteorological and Aquatic. We are due a few more showers, on account of the sun's change of base for the summer campaign, and Old Pluv. lay around all night before last and yesterday morning waiting the signal to "turn her loose" in abundant copiosity. It occurs to us that we have had a sufficient share of rain for the present, and enough to do for some time to come, and more just at this time will seriously interfere with the farmers and gardeners in these parts. So, Mr. Pluv., we hope you will retire with your old sprinklingmachine to some other locality, where your presence would be more desirable. The sun shone with a sickly effort during the afternoon yesterday, but the clouds continued to linger about in spots, and, on the rain question, we may or may not be happy yet. We can say nothing new about the rivers, as our latest reports give no material changes from those of yesterday. Heavy running ice is reported at St. Louis, with a five-inch rise in the river, which will be increased in a day or two by the reported rapid rises in upper streams. Our telegraphic correspond-ence and the official table below give the latest and most reliable particulars concerning the weather and rivers at all points:
